

JLG Attachment

JLG Telehandler Attachments - Following retirement in the late 1960's, John L. Grove started out on a cross country RV voyage. After spending many years establishing his family built crane business with his brother, John had no idea that this trip would bring forth the rise of JLG Industries, Inc. The world leader of mobile aerial work platforms and precision materials handling technologies was the end result of a road expedition.

While on their journey, John spent time talking to past business associates whom the Groves stopped to visit along the way. These conversations combined with a tragic occurrence-two workers being electrocuted on scaffolding when the Groves were going to the Hoover Dam- John discovered a substantial marketplace for a product that could swiftly and safely lift individuals in the air to accomplish upkeep and other building services.

Upon returning from their travels, John established a partnership with two friends and obtained a metal fabrication company in McConnellsburg, Pennsylvania. In 1970, opening operations with a crew of twenty employees, they manufactured and sold the first JLG aerial work platform. The company incorporates some of the simple design elements of that original lift into existing designs.

Since then, JLG Forklifts have come a great distance from when Mr. John L. Grove came back from his fatefull cross-country trip and since the first JLG aerial platform entered the market. As of today, the business has extended itself into a number of international markets and continues to develop contemporary equipment to ensure that clients are able to become safer and more efficient within their workplace.
