

JLG Forklift Part

JLG Forklift Parts - Following retirement in the late 1960's, John L. Grove started on a cross country RV voyage. After spending many years establishing his family built crane company with his brother, John had no idea that this trip would bring forth the rise of JLG Industries, Inc. The world leader of mobile aerial work platforms and precision material handling equipment was the end consequence of a road trip.

Whilst on their journey, John spent time talking to previous business associates whom the Groves stopped to visit along the way. These conversations combined with a tragic event-two workers being electrocuted on scaffolding when the Groves were traveling to the Hoover Dam- John uncovered an infinite marketplace for a product that could quickly and securely elevate people in the air to accomplish maintenance and other building functions.

Upon returning from their travels, John established a partnership with two friends and obtained a metal fabricating company in McConnellsburg, Pennsylvania. In 1970, starting operations with a crew of twenty personnel, they built and sold the first JLG aerial work platform. The business incorporates many of the basic design elements of that original lift into existing models.

Since then, JLG Forklifts have come a long way from when Mr. John L. Grove returned from his fatefull cross-country trip and since the first JLG aerial platform entered the marketplace. As of today, the business has expanded itself into several global marketplaces and continues to cultivate new machinery to guarantee that consumers are able to become safer and more efficient within their workplace.
