

Forklift Electrical Part

Electrical Part for Forklifts - Lift trucks together with different forklifts may have specific labels utilized in some hazardous locations. The label indicates that this particular model of forklift meets the minimum standards of ANSI/UL 553 for electric forklifts or ANSI/UL 558 for internal combustion engine lift trucks.

Applications for labeled forklifts can be found in National Fire Protection Association NFPA 505 - Powered Industrial forklifts including: Type Designations, Areas of Use, and Maintenance and Operation. Check with your local insurance carrier and Fire Marshall for further info on the approved uses of industrial powered trucks in your application.

If the certain lift truck meets the outlined criteria, labels could be attached. A labeled lift truck would show the type of designation located on the nameplate and would have a correctly corresponding label attached.
